

Chesapeake Technology SonarWiz 5 Training Workshop

September 21-22, 2010 - Redmond, WA

Chesapeake Technology, Inc. is pleased to be offering a SonarWiz 5 Training in Redmond, Washington on September 21-22, 2010.

This 2-day workshop of in-depth instruction and training on the newest features of SonarWiz 5. This is a hands-on class that will include a half day of real-time data acquisition aboard a vessel provided by TetraTech.

The focus of the workshop will be on SonarWiz 5 and the newest features users can utilize to improve their efficiency. Attendees will not only learn the basics of the new software, but also have their project specific questions answered by the experts. They will be asked to bring a laptop and any data they would like to work on with an expert engineer. The limited class size enables a personalized experience and individualized training on real-time acquisition and post-processing data.

Who Should Attend?

Current Users, increase productivity with SonarWiz 5 by obtaining advice and tips from the Chesapeake engineering team, sharing personal experience and knowledge with other users and providing input for new features and enhancements. Learn and experiment with techniques that will help you process your data more efficiently.

SonarWeb Users, if you are currently using SonarWeb, take advantage of the generous workshop discount offer to upgrade to SonarWiz 5.

Potential Users, you've heard good things about Chesapeake now here's your chance for us to prove it to you. Purchase any version of SonarWiz 5 within 60 days of the class and CTI will apply your registration fee towards your purchase.

What You Will Learn

Day 1:

Setting up a Project:

Real-time Data Acquisition and Mosaic Processing Techniques

Mosaic Post-Processing Techniques
